piD-TECH Plug-In Photoionization Sensor Released at AIHCE 2002 June 1-June 6 in San Diego

Mocon Baseline announces the release of **piD-TECH**, a plug-in photoionization sensor for portable and permanent monitors that use City Technology™ - 4P cells. With a linear dynamic detection range of less than 1 to 2,000 ppm, the compact piD-TECH provides manufacturers the opportunity to move into a variety of environmental and safety applications in industrial, commercial and residential markets. About Baseline - Mocon, Inc.

Baseline instruments for gas chromatography and gas analysis set the standard for automated process stream, industrial hygiene, hazard and emissions monitoring. Baseline offers a complete line of analytical instrumentation for gas analysis including a large selection of continuous analyzers, gas chromatographs and portable personal monitors.

The product line also includes a variety of complimentary products such as multipoint samplers, calibration systems, sample conditioners, support gas generators, and data acquisition systems. The Baseline full-service product line is well supported by an experienced team of applications and systems specialists.

Designed for optimum reliability, compactness and operational simplicity, Baseline - Mocon products meet the growing demand for environmental, industrial hygiene, BTU, well logging and industrial gas analysis.

PID Plus Paks!

Questar Baseline Portable PID Plus Paks include the PID Plus Data Logging Software and connection cable. The PID Plus Data Logging Software and connection cable allow you to download data and status information for reports, add response factors, convert numeric tags to text and enable or
